# Universal Racials

## Overview

The **Universal Racials** module is an optional plugin under the **Universal Utility** system. You must first install it via the Marketplace. After enabling, you'll find it here:

Main Menu -> Universal Utility -> Universal Racials

This module intelligently handles the usage of all available **Racial Abilities** (Orc, Troll, Undead, Blood Elf, etc.) based on smart combat context.

### 1 – Modes

- Defensive**  
Casts racials like *Stoneform*, *Shadowmeld*, or *Will of the Forsaken* in dangerous situations, such as incoming CC or magic damage.
- Offensive**  
Uses abilities like *Blood Fury* or *Berserking* during burst windows or paired with other offensive cooldowns.

### Smart Usage Logic

All racial abilities are cast under context-aware logic, such as:

- Current health
- Buff uptime syncing
- Combat duration forecasts

 NOTE

You can fine-tune these in your Advanced Settings if needed.
