Universal Dispel

Overview

The **Universal Dispel** module is an optional but powerful sub-plugin in the **Universal Utility** ecosystem. First, activate it through the Marketplace. Then, enable it under:

Main Menu -> Universal Utility -> Universal Dispel

This plugin automatically detects and removes harmful debuffs in **PvP** and **PvE** based on pre-configured logic.

1 - Core Settings

- Priority Filter**
Controls how aggressively the plugin prioritizes dispels (Low / Medium / High)
- Combat Mode**
Can run in PvP only, PvE only, or Both
- Humanizer Preset**
Simulates human-like reaction time (Slow / Medium / Fast)
- Allow Drawings**
Toggles visual feedback for dispel events in-game.

Built-in Spell Database

Works out of the box using a curated list of dangerous debuffs per class and encounter type. We encourage users to report missing or misclassified debuffs for refinement.

 TIP

Don't waste time looking for who needs a dispel—Universal Dispel does it instantly and intelligently.
